

7 June 1963

MEMORANDUM FOR: The Inspector General

SUBJECT : Comments on DD/P's Reply to Africa Survey
Recommendations

1. In those recommendations where DD/P concurs or concurs with modifications, my only comment is that some of the explanations are pretty broad, particularly as relates to details regarding implementation.

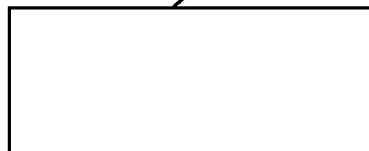

2. The following comments are directed toward recommendations in which there was non-concurrence.

No. 17 - This is like saying I am not going to plant the corn until the potatoes come up. If the action is logical, as they say, it should be implemented and the means to implement it should be furnished to Chief, Africa Division.

No. 21 - The last sentence creates a false impression that the Chief of Station opposes this recommendation. In fact, he does not, but strongly recommended it and even comments on this recommendation in his April  The Chief of Station has acceded to Headquarters wishes in this matter.

3. I believe the policy of not fighting City Hall on the part of the Inspector General is a sound one. Therefore, I do not feel these comments should be furnished to higher offices.
